

## HP Designjet L65500 Printer

### Overview

Designed with the environment in mind, the HP Designjet L65500 Printer featuring HP Latex Inks and HP Wide Scan Printing Technology offers print service providers (PSPs) a versatile print system that can produce a wide range of applications – from point-of-purchase displays, transit signage, wall murals and exhibition graphics to vehicle graphics and fleet marking, and a variety of exterior and interior event signage. Together, these technologies provide durable, odorless(1) prints; sharp, vivid image quality; application versatility and high productivity, enabling PSPs to increase their print capacity and grow their business while reducing the impact of their printing on the environment.

### Features

#### **Achieve outdoor and indoor application versatility.**

- Print rich, saturated colors and deliver applications that impress with the six-color HP Designjet L65500 printing system with HP Latex Inks. Astound customers with high-resolution, up to 1200 dpi prints.
- Performance comparable to low-solvent ink—in a water-based ink. HP Latex prints achieve up to three years display permanence un laminated, five years laminated and provide scratch, smudge, and water resistance comparable to low-solvent inks.[3]
- Capitalize on a printing system that delivers great results across a wide range of media and expand your business. Whatever the application—outdoor banners, POP displays, or soft signage[5]—you will enjoy the same outstanding results.
- Expect impressive results with a new HP large-format media portfolio. Original HP media and the printing system deliver outstanding results every time you print. Achieve both durability and vivid image quality with a new HP media surface treatment.

#### **Reduce the impact of printing on the environment.**

- Create an improved printing environment for your employees, and attract the business of environmentally conscious customers. No special ventilation is required[2] and regulatory fees or penalties may be reduced in some regions.[8]
- Gain a competitive edge with odorless prints[1] that allow placement in Point-of-Purchase areas where odor is a concern.
- Original HP supplies are designed with the environment in mind. Use Original HP recyclable media[6] and take advantage of the HP Planet Partners program to return the printheads.[11] The ink cartridge includes a recyclable cardboard container.[13]
- Designed together, recyclable HP large-format substrates[6] and the HP Designjet L65500 printing system deliver incredible print quality, consistent performance, and application versatility—and they reduce the impact of printing on the environment.

#### **Deliver high-speed, productive printing.**

- Deliver more quickly and consistently with two innovative HP technologies. Take full advantage of HP Wide Scan Printing Technology to deliver faster at high print speeds. The HP Optical Media Advance Sensor advances media precisely.
- Produce consistent color from print to print and job to job with HP DreamColor Technologies. Reduce error, operator intervention, and waste with automated color calibration. You save media, ink, and time—while delivering incredible, consistent color.
- Enjoy greater productivity with low-maintenance, water-based HP Latex Inks. Prints dry inside the printer, so you don't have to wait to finish or deliver them. Reduce interruptions with HP Latex Inks and low-maintenance features.
- Experience a more efficient workflow with the HP Internal Print Server, which enables independent print queue management and manual nesting.
